Education

University of California, Los Angeles Sep 2024 – Mar 2026

Bachelor of Science, Statistics & Data Science — GPA 3.6

Relevant coursework: Linear Models, Monte Carlo Methods, Statistics in Finance, Geostatistics, Causality

Exams

SOA P Exam (Passed) January 2026

SOA FM Exam (Passed) August 2026

Experience

Minthril Sep 2026 – Present

Independent Consultant

- Provided supply chain consulting services for a large manufacturing company
- Streamlined production plans using Microsoft Excel pivot tables and VBA, cutting processing time by 90%

Data Detectives Jun 2025 – Aug 2025

Data Analytics Intern

- Designed and built automated ETL pipelines in Python to ingest, clean, validate, and transform Bay Area housing data from multiple sources for predictive modeling
- Implemented data quality and enrichment processes, generating synthetic training datasets using the SDV library to augment model performance
- Trained a random forest regression model to predict home values from the cleaned housing dataset

Awe & Reverence Jun 2023 – Aug 2023

Software Apprentice

- Built full-stack websites using React, MySQL, and other common tools
- Partnered directly with the founder to scope, build, and ship features on tight timelines

Rooted Software — Concord, CA (Hybrid) May 2022 – Aug 2022

Information Technology Intern

- Developed mobile applications using React Native for a church with 1,000+ members
- Configured hardware for a private K-8 school with 400+ students

Chick-fil-A — Walnut Creek, CA Mar 2022 – Aug 2022

Front of House

- Took and fulfilled orders for 100+ guests per shift
- Maintained accuracy and speed while managing multiple simultaneous orders during high-volume rush periods

Projects

City of Berkeley Budget Data — Built a set of interactive Tableau dashboards visualizing the City of Berkeley's municipal budget from 2012–2015, making several years of civic spending data easy to browse and compare.

NBA Game Simulator — Built a Python pipeline that scrapes real NBA player and team stats spanning the last 40 seasons to drive a dice-based basketball game simulation, capable of simulating both individual games and full seasons with play-by-play logs and final box scores.

Quick Draw — Built a full-stack tournament bracket tool with Next.js, TypeScript, and Supabase to organize and run single-elimination, double-elimination, round robin, and swiss format competitions.

Skills

Skills: Probability Theory, Microsoft Excel, R, Data Analysis, SQL, Python, AI Fluency
