## Education

**University of California, Los Angeles** Sep 2024 – Mar 2026

*Bachelor of Science, Statistics & Data Science — GPA 3.6*

Relevant coursework: Linear Models, Monte Carlo Methods, Statistics in Finance, Geostatistics, Causality

## Experience

**Minthril** Sep 2026 – Present

*Independent Consultant*

- Provided supply chain consulting services for a large manufacturing company
- Streamlined production plans using Microsoft Excel pivot tables and VBA, cutting processing time by 90%

**Data Detectives** Jun 2025 – Aug 2025

*Data Analytics Intern*

- Designed and built automated ETL pipelines in Python to ingest, clean, validate, and transform Bay Area housing data from multiple sources for predictive modeling
- Implemented data quality and enrichment processes, generating synthetic training datasets using the SDV library to augment model performance
- Trained a random forest regression model to predict home values from the cleaned housing dataset

**Awe & Reverence** Jun 2023 – Aug 2023

*Software Apprentice*

- Built full-stack websites using React, MySQL, and other common tools
- Partnered directly with the founder to scope, build, and ship features on tight timelines

**Rooted Software — Concord, CA (Hybrid)** May 2022 – Aug 2022

*Information Technology Intern*

- Developed mobile applications using React Native for a church with 1,000+ members
- Configured hardware for a private K-8 school with 400+ students

**Chick-fil-A — Walnut Creek, CA** Mar 2022 – Aug 2022

*Front of House*

- Took and fulfilled orders for 100+ guests per shift
- Maintained accuracy and speed while managing multiple simultaneous orders during high-volume rush periods

## Projects

**Quick Draw** — Built a full-stack tournament bracket tool with Next.js, TypeScript, and Supabase to organize and run single-elimination, double-elimination, round robin, and swiss format competitions.

**NBA Game Simulator** — Built a Python pipeline that scrapes real NBA player and team stats spanning the last 40 seasons to drive a dice-based basketball game simulation, capable of simulating both individual games and full seasons with play-by-play logs and final box scores.

**CFB Dynasty Sim** — Ported a spreadsheet-based college football recruiting and aging engine into a full-stack Next.js and TypeScript web app, supporting both a 72-team league and an expanded 144-team mega-league with save slots for multiple concurrent dynasties.

## Skills

**Skills:** Python, SQL, ETL Pipeline Development, Data Analysis, R, Microsoft Excel, AI Fluency
