EDUCATION

University of California, Los Angeles

Sep 2024 – Mar 2026

Bachelor of Science, Statistics & Data Science — GPA 3.6

Relevant coursework: Linear Models, Monte Carlo Methods, Statistics in Finance, Geostatistics, Causality

EXPERIENCE

Data Detectives — Remote

Jun 2025 – Aug 2025

Data Analytics Intern

- Designed and built automated ETL pipelines in Python to ingest, clean, validate, and transform Bay Area housing data from multiple sources for predictive modeling
- Implemented data quality and enrichment processes, generating synthetic training datasets using the SDV library to augment model performance
- Key lesson: data is everywhere — models are critical to help us draw insights and make decisions from it

Awe & Reverence — Remote

Jun 2023 – Aug 2023

Software Apprentice

- Built full-stack websites using React, MySQL, and other common tools
- Key lesson: good communication and solid coding practices are the cornerstones of the tech world

Rooted Software — Concord, CA (Hybrid)

May 2022 – Aug 2022

Information Technology Intern

- Developed mobile applications using React Native for a church with 1,000+ members
- Configured hardware for a private K-8 school with 400+ students
- Key lesson: skills are most valuable when used to effect real, meaningful change

Chick-fil-A — Walnut Creek, CA

Mar 2022 – Aug 2022

Front of House

- Took and fulfilled orders for 100+ guests per shift
- Demonstrated leadership and communication in a professional environment
- Key lesson: high agency and dedicated drive can make a big difference in any working environment

PROJECTS

Bay Area Housing AVM — Built an end-to-end data pipeline that scrapes, cleans, and consolidates online listing data, then loads it into a predictive model of Bay Area home values; using simple, publicly available data, achieves a model explaining more than 86% of the variance in home prices.

NBA Game Simulator — Built a Python pipeline that scrapes real NBA player and team stats spanning the last 40 seasons to drive a dice-based basketball game simulation, capable of simulating both individual games and full seasons with play-by-play logs and final box scores.

SKILLS

Industry: AI Fluency, Data Analysis, Probability Theory, Microsoft Excel, R, Python, SQL

Interpersonal: Leadership, Communication, Administration
