Education

University of California, Los Angeles Sep 2024 – Mar 2026

Bachelor of Science, Statistics & Data Science — GPA 3.6

Relevant coursework: Linear Models, Monte Carlo Methods, Statistics in Finance, Geostatistics, Causality

Experience

Minthril Sep 2026 – Present

Independent Consultant

- Provided part-time supply chain consulting services for a large manufacturing company
- Streamlined production plans with Microsoft Excel pivot tables, VBA macros, and dashboards, cutting processing time by 90% (multiple days to one click)

Data Detectives Jun 2025 – Aug 2025

Data Analytics Intern

- Built automated data pipelines in Python to clean and transform Bay Area housing datasets for predictive modeling
- Generated synthetic training datasets using the SDV library to augment model performance
- Trained a random forest regression model to predict home values from the cleaned housing dataset

Awe & Reverence Jun 2023 – Aug 2023

Software Apprentice

- Built full-stack websites using React, MySQL, and other common tools
- Partnered directly with the founder to scope, build, and ship features on tight timelines

Rooted Software — Concord, CA (Hybrid) May 2022 – Aug 2022

Information Technology Intern

- Developed mobile applications using React Native for a church with 1,000+ members
- Configured hardware for a private K-8 school with 400+ students

Chick-fil-A — Walnut Creek, CA Mar 2022 – Aug 2022

Front of House

- Took and fulfilled orders for 100+ guests per shift
- Maintained accuracy and speed while managing multiple simultaneous orders during high-volume rush periods

Projects

Quick Draw — Built a full-stack tournament bracket tool with Next.js, TypeScript, and Supabase to organize and run single-elimination, double-elimination, round robin, and swiss format competitions.

NBA Game Simulator — Built a Python pipeline that scrapes real NBA player and team stats spanning the last 40 seasons to drive a dice-based basketball game simulation, capable of simulating both individual games and full seasons with play-by-play logs and final box scores.

CFB Dynasty Sim — Ported a spreadsheet-based college football recruiting and aging engine into a full-stack Next.js and TypeScript web app, supporting both a 72-team league and an expanded 144-team mega-league with save slots for multiple concurrent dynasties.

Skills

Skills: AI Fluency, Data Analysis, Probability Theory, Microsoft Excel (Pivot Tables, VBA), R, Python, SQL
