Education

University of California, Los Angeles Sep 2024 – Mar 2026

Bachelor of Science, Statistics & Data Science — GPA 3.6

Relevant coursework: Linear Models, Design and Analysis of Experiments, Statistical Models and Data Mining, Monte Carlo Methods, Causality

Experience

Minthril Sep 2026 – Present

Independent Consultant

- Provided part-time supply chain consulting services for a large manufacturing company
- Streamlined production plans with Microsoft Excel pivot tables, VBA macros, and dashboards, cutting processing time by 90% (multiple days to one click)

Data Detectives Jun 2025 – Aug 2025

Data Analytics Intern

- Built automated Python pipelines to ingest, clean, validate, and transform housing data from multiple sources, ensuring the data was reliable and analysis-ready for predictive modeling
- Generated synthetic training datasets using the SDV library to augment model performance
- Trained and evaluated a random forest regression model to predict home values from the cleaned dataset

Awe & Reverence Jun 2023 – Aug 2023

Software Apprentice

- Built full-stack websites using React, MySQL, and other common tools
- Partnered directly with the founder to scope, build, and ship features on tight timelines

Rooted Software — Concord, CA (Hybrid) May 2022 – Aug 2022

Information Technology Intern

- Developed mobile applications using React Native for a church with 1,000+ members
- Configured hardware for a private K-8 school with 400+ students

Chick-fil-A — Walnut Creek, CA Mar 2022 – Aug 2022

Front of House

- Took and fulfilled orders for 100+ guests per shift
- Maintained accuracy and speed while managing multiple simultaneous orders during high-volume rush periods

Projects

City of Berkeley Budget Data — Analyzed several years of municipal budget data and built interactive Tableau dashboards for self-serve exploration, making spending easy to browse and compare.

NBA Game Simulator — Built a Python pipeline that scrapes and structures real NBA player and team stats spanning the last 40 seasons to drive a dice-based basketball simulation, generating play-by-play logs, box scores, and season standings.

Quick Draw — Built a full-stack, database-backed tournament bracket tool with Next.js, TypeScript, and Supabase to organize and run single-elimination, double-elimination, round robin, and swiss format competitions.

Skills

Skills: Python, R, SQL, Tableau, Microsoft Excel (Pivot Tables, VBA), Statistical Analysis, Experimental Design, Regression and Machine Learning, Data Cleaning & Validation, Data Visualization, Git/GitHub, AI Fluency
