## Education

**University of California, Los Angeles** Sep 2024 – Mar 2026

*Bachelor of Science, Statistics & Data Science — GPA 3.6*

Relevant coursework: Linear Models, Statistical Models and Data Mining, Design and Analysis of Experiments, Monte Carlo Methods, Causality

## Exams

**SOA P Exam (Passed)** January 2026

**SOA FM Exam (Passed)** August 2026

## Experience

**Minthril** Sep 2026 – Present

*Independent Consultant*

- Provided part-time supply chain consulting services for a large manufacturing company
- Streamlined production plans with Microsoft Excel pivot tables, VBA macros, and dashboards, cutting processing time by 90% (multiple days to one click)

**Data Detectives** Jun 2025 – Aug 2025

*Data Analytics Intern*

- Built automated Python pipelines to extract, clean, validate, and transform housing data from multiple sources into accurate, analysis-ready datasets for predictive modeling
- Generated synthetic training datasets using the SDV library to augment model performance
- Trained a random forest regression model to predict home values from the cleaned dataset

**Awe & Reverence** Jun 2023 – Aug 2023

*Software Apprentice*

- Built full-stack websites using React, MySQL, and other common tools
- Partnered directly with the founder to scope, build, and ship features on tight timelines

**Rooted Software — Concord, CA (Hybrid)** May 2022 – Aug 2022

*Information Technology Intern*

- Developed mobile applications using React Native for a church with 1,000+ members
- Configured hardware for a private K-8 school with 400+ students

**Chick-fil-A — Walnut Creek, CA** Mar 2022 – Aug 2022

*Front of House*

- Took and fulfilled orders for 100+ guests per shift
- Maintained accuracy and speed while managing multiple simultaneous orders during high-volume rush periods

## Projects

**City of Berkeley Budget Data** — Built interactive Tableau dashboards on several years of municipal budget data (2012–2015), making spending easy to browse and compare for non-technical audiences.

**NBA Game Simulator** — Built a Python pipeline that collects and processes real NBA player and team stats spanning the last 40 seasons to drive a dice-based basketball simulation, producing play-by-play logs, box scores, and season standings.

**Quick Draw** — Built a full-stack, database-backed tournament bracket tool with Next.js, TypeScript, and Supabase to organize and run single-elimination, double-elimination, round robin, and swiss format competitions.

## Skills

**Skills:** Python, SQL, R, Microsoft Excel (Pivot Tables, VBA), Tableau, ETL Pipelines, Data Cleaning & Validation, Statistical Analysis, Data Visualization, MySQL, Git/GitHub, AI Fluency
